

Dr. Abdul Halim Abdul Jalil is a highly accomplished Consultant Pediatrician, currently serving at KPJ Ampang Puteri Specialist Hospital and KMI Taman Desa Medical Centre in Kuala Lumpur. With a rich background, he previously held prestigious positions including Professor and Head of Pediatrics at Lincoln University College. Dr. Halim's expertise extends to his role as the former director of the Specialist and Reproductive Research Centre at the National Population & Family Development Board.

He has been a pioneering researcher in live cell therapy, actively contributing to international conferences and publications, including his recent book titled "Hope for Untreatable Medical Disorders - Live Cell Therapy explained." Additionally, he founded the first Multidisciplinary Clinic for Children with Developmental and Behavioral problems and served as the founding President of the National Autistic Society of Malaysia.

Dr. Halim's influence also reaches the media, where he frequently appears on radio and TV programs as an expert speaker. Currently, he holds significant positions as the Chief Editor/Chief Advisor of international medical research journals and serves on the expert advisory panel for stem cell treatment at the Ministry of Health, Malaysia.

His dedication to healthcare is further evidenced by his roles as the Executive Chairman of Makmal Perintis Sdn Bhd/Falim Holding Sdn Bhd and non-Executive Chairman of Klinik Falim Sdn Bhd. Dr. Halim's vast experience and expertise make him a sought-after keynote and plenary speaker at various local and international conferences on child/family health and stem cell transplantation.
